

Cookie Policy

This Cookie Policy integrates and completes the information on personal data processing of the Altavia Italia website.

When logging into the Website for the first time, the user will be presented with condensed information on the use of cookies. By closing this information by pressing the appropriate key or by clicking outside the banner that contains it and continuing the website navigation, the user will allow the use of third party cookies, according to the method described in this Cookie Policy.

What is a cookie?

Cookies are small text and figure files that are downloaded and recorded in the memory of the user's navigation browser, when he visits a website and every time he accesses an internet page. These small text and figure files are used for various and important functions within the web, such as to carry out automatic authentications, keeping a trace of sessions, memorizing information to improve the website navigability or the user's navigation experience. Every domain visited through a browser can set one or more cookies. An internet page may contain objects coming from many different domains and each one of these may set cookies (in this case these are named "of third parties").

The use of cookies enables to improve the navigation experience inside the website and maintain the settings chosen by the user in his/her subsequent visit.

Taking into account the General Provision of the Guarantor dated 2014, and depending on the purposes sought, cookies may be qualified as follows:

- **Technical cookies** – these are cookies that allow navigation and/or the provision of a service requested by the user (for example, cookies that automatically recognize the language used by the user).
- **Analytical cookies:** these are the cookies used by website operators to collect information in an aggregate way having a statistical nature (for instance the number of visitors to the website). In turn, the analytical cookies can be first party cookies, installed directly in the website being visited and third party analytical cookies, made available by third parties.
- **Profiling cookies:** these are the cookies that monitor the user's navigation, tracing the behaviour of a user and the preferences expressed in order to send advertising messages in line with his/her profile.

Cookies used

Our website uses various typologies of cookies each of which has a specific function.

We list hereunder the cookies used by our website:

- **Technical navigation cookies:** These are created upon first access to the website; these enable the website to function correctly and more rapidly and will allow you to view the contents on your device by recognizing the language and the Country from which you chose to log in. Technical navigation cookies are necessary for the functioning of the website and therefore they cannot be deactivated by the user.

NAME OF THE COOKIE AND RETENTION TIME	CHARACTERISTICS AND PURPOSES
wire	The cookie is necessary to memorize any session variables and for the basic technical operation of the website.

Deactivating the use of Cookies

Most browsers are configured to accept cookies. However, it is possible to deactivate the use of cookies through the browser settings so that "third party" cookies are not accepted. We remind you that the deactivation of navigation and/or function cookies may result in the malfunction of the Website.
